New N Scale Heavyweight Horse Car!

N

This 70' heavyweight horse car was built by American Car and Foundry in 1928 and was painted Pullman green and ran on 6-wheel passenger trucks. These cars allowed railroads to capitalize on the growing racehorse business during the first half of the 20th Century. The interior had convertible gates to adjust to the size and value of the load and could carry as many as 24 horses safely. Later these cars were used to transport vehicles, theater, and circus props across the country.

#149 00 110...\$29.95

This 70' heavyweight horse car is painted Tuscan red with buff colored lettering. Built by American Car Foundry in 1914, the car name was changed to "New Hampshire Jockey Club" on November 12, 1938. It was equipped with stalls for 24 horses and had a lightweight of 129,000 pounds and rode on 3C-PI trucks.
