MDC/Roundhouse	Rolling Stock		High Side Thrall Gondola			1016 (001 02 006) (lid up)	Use 00-90 screw w/ countersink head, & trim end flush w/ inside frame so weight fits properly (no coupler fits MDC draft gear box)	1037 (003 01 042)	
MDC/Roundhouse	Rolling Stock		50' Overland Passenger Car		1112 (001 32 020)				
MDC/Roundhouse	Rolling Stock		50' Express Reefer			1015 (001 02 000), 1016 (001 02 006)	Due to the way the truck mounted draft gear box is made on the commonwealth freight trucks on this model, truck conversions are not possible. Remove the gear box. Drill and tap an 00-90 hole 1/16 in from the end of the underbody. (Note: the coupler must be mounted 1/16 in, not 1/8 in from the end, or else the draft gear box will interfere with the trucks.) The coupler will need a .038" shim in order to set it at the proper height (.216"). Note: Using 3/16" 00-90 screws requires an additional 1/16" hole in the bottom of the car shell at each end to clear the end of each		U.S.A.

MDC/Roundhouse	Rolling Stock		70-Ton 3-Bay Open Hopper	Model Die Casting		1023 (001 02 009)/1025	Instructions: Body Mount: (1) File off .020" (0.5 mm) from underside of mounting pad on diecast underframe. (2) Drull out coupler mounting screw hole using #56 drill and tap for 00-90 screw. (3) Trim off about .050" (1.25 mm) from rear of assembled #1023 (001 02 009)/1025 draft gear box so it is even with the ends of the coupler shanks. (4) File the rounded outward facing part of body bolster flat just enough to fit into the mounting pad. (5) Trim the truck bolster on one side so that it doesn't rub the draft gear box. MTL Truck Replacement: File off .025" (0.65 mm) from underside of coupler mounting pad on diecast underframe to	1000 (003 01 021)-1 (low profile wheels)
